There is a statement, from a pretty good authority, that the President has decided to recommend, sooner or later, to Congress some changes in the laws that created the bureau of corporations. The President has given much study to the question of publishing some of the figures obtained by this bureau as to the business of corporations. to discuss the subject of statehood to any extent, as it is pretty well understood that he gave his sanction to the measure pending in Congress for the creation of two new state out of the four legally constituted territories. This will proposes to make one state out of Arizona and New Mexico and one out of Indian territory and Oklahoma. Despite the republican program as prevent the carrying out of this plan. The people of the Indian territory do not want to be attached to Oklahoma in a singie state, largely because Oklahoma would be able to outvote them and take care of their own interests accordingly.

One feature as to statehood which the President will touch upon in his message

of Indians in the Indian territory. He will recommend that when the new state is cre ated laws shall be passed that will guar antee the rights of the Indians in every respect and not leave them subject to the caprice of state legislation.

Alaska.

As to Alaska, the President will outline a policy of Hberal treatment for the people of that territory. It was largely through his influence that some laws were passed at the last session of Congress tending to the development of the territory, and the citizens there still look to him to help them in the coming session of Congress in passing some of the pending bills. The principal measures are appropriations for the construction of roads to the interior, and for the creation of at least one more judicial district. The rights of the Indians will be touched

Bad Sanitary Conditions in Cuban Cities Reported.

Bad sanitary conditions in Santiago and other places in Cuba have at last become such a menace, not only to the health of Cuba, but that of the outside world, that the United States government has felt called on to address the Cuban government on the subject. The United States charge at Havana has been instructed to call the attention of the Cuban government to this situation and express the hope that prompt and thorough relief will be forthcoming. In a recent report received here the description of the condition of the streets in Santiago shows the seriousness of the condition. It is stated that there is practicaly no drainage, and that water is allowed to stand in the streets for days at a time. The fact that President Palma in his recent message to the Cuban congress asked for an appropriations of \$200,000 for improving the sanitation of such towns as needed it leads to the hope that the American representations on the subject may have the desired effect

Prospects for peace in the Dominican republic for the next few months are better, according to a report received at the State Department today from United States Minister Dawson at Santo Domingo. The minister says he has been assured that the revolutionists received no resard for their the bedclothes. The plane tuner says surrender, although the governmental com-mander at Barahona is said to have given them assurances of personal safety. The latter has assured Minister Dawson that he anticipates no further serious disturbances. The min-ister adds that the discussion about the re-

Evidence of quieter conditions at Port au Prince, Haiti, has come to the State Department in a report from John D. FOREST FIRE MENACES VILLAGE. Started by Spark From Locomotive-Fears for Preperty.

MONONGAHELA, Pa., November 23.-A forest fire, which was started by a railroad engine spark last Sunday on the hillside opposite here, broke out afresh last night, and the flames now menace not only the tipple of the Mongah mine and farm houses which lie in the path of the fire, but the whole village of Axleton.

Axleton is at the foot of the hill, about a half mile up the river from where the blaze of the Siberian side, the intervening disis now raging, and besides about fifty houses, centains the plant of the Liggett

houses, contains the plant of the Liggett spring and axle works, removed last year from Allegheny, Pa. The buildings are at the edge of the woods and will full an easy prey to the flames unless the efforts of the fire-fighters are successful.

Extreme danger threatens farm houses and crops on the level land at the top of the hill. Here men are now racing against the flames in an endeavor to plow up enough earth to stay their course.

A stretch of a mile along the high hill-side has already been swept by the flames. At the Mongah mine an effort is being made to save the company's property by starting smaller fires to meet the larger one.

of Many Opinions.

The President is absorbing many views

The President talked with Eugene N. Foss of Massachusetts a few days ago. Mr. Foss advocated tafiff revision, and on leaving the White House declared that the election of W. L. Douglas as governor of Massachusetts was due to his advocacy of tariff revision and reciprocity with Canada. The next day the President received a long telegram signed by business men of Boston declaring that this statement as to the election of Douglas was false in every particular. The President showed this tele-gram to some of his tariff revision callers a day or two ago.

CHARGES REGARDING INDIANS WILL BE INVESTIGATED.

Gov. Brady of Alaska to Be Reapported-Addresses by Members of the Cabinet.

Representative Cooper of Wisconsin, chairman of the insular affairs committee of the House of Representatives, extended to President Roosevelt today his congratulations on the result of the election. The President told Mr. Cooper that the result in ne state was to him personally more surprising or gratifying than that in Wisconsin. He said he had hoped to carry the state, but not by so unexpected a plurality as 130,000.

Mr. Cooper afterward said he had not taken up with the President any matters of legislation that might be considered at the approaching session of Congress. He expressed the belief that the Senate would pass this winter the measure passed by the House at the last session providing for extensive public improvements in the Philippines in the form of highways, railroads, school houses, etc. In Chairman Cooper's opinion, the development of the islands and the material progress of the inhabitants depends, in a great measure, upon the enactment of this law. Mr. Cooper said he did not confer with the President on the subject of the tariff in any form.

Father Schell Sees the President.

Rev. Father Joseph Schell, who has made quite a stir in the west because of his allegations charging debauchery and swindling of Winnebago Indians, was introduced at the White House today by Edward Rosewater of the Omaha Bee. The President talked a few minutes with the priest and then asked that he make a written statement as to the treatment of the In-dians. This statement will be investigated later by officials of the Indian bureau of the Interior Department. Mr. Rosewater was a guest of the President at luncheon in the afternoon

Father Schell has procured the indict-ment of five men charged with swindling the Winnebagos. He has himself been in-dicted for forgery because of his activity in the case, but Mr. Rosewater and other influential men are his friends and say they will see him through. The complaints to be submitted to the President by Father Indian affairs January 1. In the mean-time Father Schell proposes to continue his crusade against the present treatment of the Indians and against the selling of whisky to them. Just outside of the reservations are many cheap saloons and low dives that profit from the government payments to the Indians. Mr. Rosewater pro-

poses to have the Nebraska legislature establish a zone around the reservation with-in which no whisky can be sold. Father Schell is not here representing the Catholic Church in his fight, but as a private citizen. He has had some trouble with high officials of his own church during his charges as to the Winnebagoes. He ac-cused Archbishop A. Christie of Portland, Ore., and others of not acting properly in the handling of funds intrusted to them for

use with the Indians. Addresses of Cabinet Members.

Senator Shelby M. Cullom of Illinois today presented to the President a committee of the Union League Club of Chicago, consisting of Wallace Heckman, president of the organization; Judge C. S. Cutting of the probate court and Mr. Sidley. The committee desired to enlist the influence of Mr. Roosevelt in an effort to induce John Hay, Secretary of State, to deliver an address before the Union League Club on Wash-ington's birthday. The President informed the committee that Secretary Hay's health was not such as to permit him to make addresses in the near future, and he felt that the Secretary ought not to be called upon to deliver a speech. The President ex-pressed the wish, also, that members of the cabinet should not be requested to deliver addresses. embers of the committee voiced the
